

ENVIROINFO 2005 conference in Brno, Czech Republic

By

Rasika Nishamanie Ranasinghe
ITC, The Netherlands

My Background

- B.Sc. (Surveying Sciences) graduate of the Sabaragamuwa University of Sri Lanka
- Lecturer (Remote Sensing) in Sabaragamuwa University of Sri Lanka
- Currently, M.Sc. Student in Geoinformatics at ITC, Enschede, The Netherlands

Study at ITC

My M.Sc. research is titled “**Multi-Scale Texture and Color Segmentation of Oblique Airborne Video Data**”

How segmentation routines can incorporate

- texture at different scale
- variation of color information

In oblique aerial video imagery within and between frames?

Data

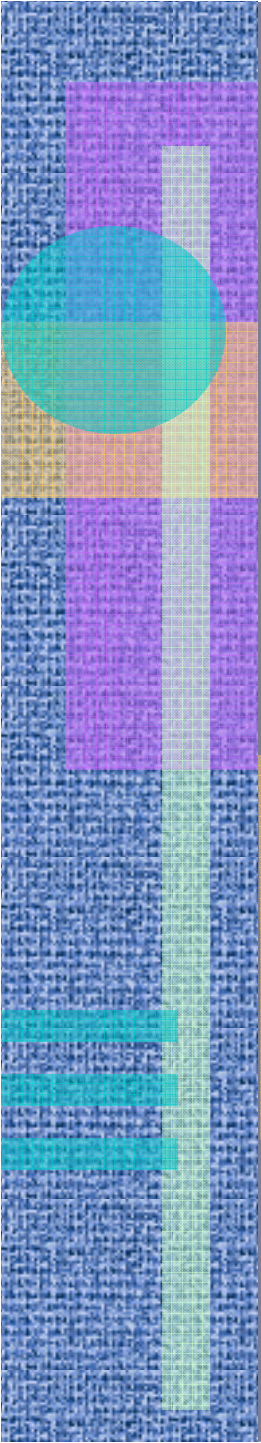

Kocaeli earthquake that occurred on 17 August 1999 in the north-western part of **Turkey**.

Expectation from the Workshop!

- To get a better understanding and more insights on the real problem regarding Emergencies and Disaster management
- To be in contact with more experienced researchers from this field
- To get more details on the tools developed for Emergencies and Disaster management.

After obtaining my Master's Degree from ITC, I will return to my University, Sri Lanka to continue my career as a lecturer.

Thank You
