Journal of Cleaner Production xx (2009) x

Special Issue of
Journal of Cleaner Production addressing
"International Trade in Biofuels"

Guest Editors:

Rainer Zah and T.F. Ruddy

*Technology and Society Lab, Empa - Materials Science & Technology,
Lerchenfeldstr. 5, CH-9014 St. Gallen, Switzerland*

Currently, many countries are establishing goals for substituting biofuels for fossil fuels. These goals usually foresee 5-10% substitution while today's production, in most countries, is far below 2%. Evidently, many countries will seek to meet their ambitious biofuel targets through imports. This global trade in biofuels, which is to some extent already taking place, will have a major impact not only on other commodity markets like vegetable oils or animal fodder but also on the global land use change and on environmental impacts.

This special issue focuses on the relation between trading, policy making and sustainability impacts of biofuels. It demonstrates the strong but complex link between biofuels production and the global food market, it unveils policy measures as the main drivers for production and use of biofuels and it analyzes various sustainability indicators and certification schemes for biofuels with respect to minimizing the adverse effects of biofuels while maximizing the benefits of the future use of biofuels.

Table of Contents:

- Zah, Rainer and Ruddy, Thomas International trade in biofuels: an introduction to the special issue
- Kaditi, Eleni Bio-energy Policies in a Global Context
- Lin, C.-Y. Cynthia et al. Import demand for Brazilian ethanol: a cross-country analysis
- Lundmark, Robert et al. European trade of forest products in the presence of EU policy
- Hansson, Julia et al. Future bioenergy trade in the EU - cost-effective trading options
- Upham, Paul et al. Substitutable biodiesel feedstocks for the UK: a review of sustainability

- Reinhard, Jürgen et al. Global environmental consequences of increased biodiesel consumption in Switzerland: Consequential Life Cycle Assessment
- Schuetz, Helmut et al. Global implications of biomass and biofuel use in Germany - Recent trends and future scenarios for domestic and foreign agricultural land use and resulting GHG emissions
- Martin, Michael Alan et al. Biofuel Development in Tanzania: A Review and Classification of Development Scales
- Matos, Stelvia et al. Brazilian Biofuels and Social Exclusion: Established and Concentrated Ethanol versus Emerging and Dispersed Bio-diesel
- Buchholz, Thomas et al. Sustainability Criteria for Bioenergy Systems: Results from an Expert Survey
- Kaphengst, Timo et al. At a tipping point? How the debate on biofuel standards is generating innovative ideas for the general future of standardization and certification schemes
- Zah, Rainer et al. Standardized and simplified life cycle assessment (LCA) as a driver for more sustainable biofuels
- Florin, Marie Valentine et al. Risk governance guidelines for bioenergy policies

The papers in this Special Issue of *Journal of Cleaner Production* are of interest and relevance to a broad range of readers. We hope that this Special Issue will foster dialogues between different stakeholders, but also provide ideas and opportunities for different research disciplines to combine their strengths while pursuing their research of nanotechnology in light of sustainability.
